

JUAN PABLO GUZMÁN

ARTIFICIAL INTELLIGENCE ENGINEER · DATA SCIENTIST

📞 (+57) 319 535 9261

✉️ juanp.gzmz@gmail.com

📍 Cali, Valle del Cauca, Colombia

ABOUT ME

Specialist in process optimization and technology adoption. I combine an analytical mindset with the ability to translate operational complexity into efficient systems. With extensive experience in government institutions, I focus on designing and implementing projects that generate real value and institutional impact.

EDUCATION

Civil Engineer
Universidad de Ibagué
2012 - 2017

Specialization in Artificial Intelligence
Universidad Autónoma de Occidente
2024 - 2025

SKILLS

- Design and implementation of industrial-scale AI solutions.
- Territorial planning and geointelligence.
- Data governance and management strategy.
- Advanced analytics.
- Construction 4.0.
- Software development.
- Strong communication skills.

LANGUAGES

English - B2 level

EXPERIENCE

2025 - 2026 **ADMINISTRATIVE DEPARTMENT FOR ENVIRONMENTAL MANAGEMENT - DAGMA**
TECHNOLOGY SOLUTIONS IMPLEMENTATION ADVISOR

I collaborated with the agency to design and implement software solutions aimed at improving the logistics of field operations teams, capturing and normalizing data in real time, and unifying multiple information sources to streamline and strengthen the agency's operations.

2024 - 2026 **SECRETARIAT OF SECURITY AND JUSTICE - DISTRICT MAYOR'S OFFICE OF SANTIAGO DE CALI**
ADVANCED ANALYTICS LEAD - SECURITY OBSERVATORY

I designed and implemented artificial intelligence and advanced data science solutions to improve security-related decision-making in Santiago de Cali, through geointelligence processes, statistical analysis, and training of predictive models with state-of-the-art techniques — achieving a deeper understanding of crime patterns across the territory and informing the formulation of public policy for the benefit of citizens.

2024 - 2025 **SECRETARIAT OF GOVERNMENT - DISTRICT MAYOR'S OFFICE OF SANTIAGO DE CALI**
TECHNICAL ADVISOR FOR DATA-DRIVEN DECISION MAKING

I secured Bloomberg's What Works Cities certification for Santiago de Cali, making it the fourth city in Colombia to receive this recognition, and developed tools for technical monitoring and the political capitalization of the mayor's office's interventions across the territory.

2024 - 2025 **NASKA - DIGITAL**
SPECIALIST INSTRUCTOR IN BUILDING INFORMATION MODELING APPLIED TO ENGINEERING

While at Naska Digital — a company recognized as an Authorized Training Center for specialized technical training in information modeling techniques applied to infrastructure projects at every level — I mentored nearly 500 construction professionals, helping shape a new generation of civil engineers prepared for the demands of Industry 4.0 in construction.
